CAREER OBJECTIVE

Aspiring Python and web developer seeking a Software Engineer role. Proficient in Python with hands-on experience delivering AI and web development projects. Bringing strong logical reasoning, excellent communication skills, and a passion for learning new technologies to contribute to organizational success.

EDUCATION

B.Tech, Computer Science and Engineering - Data Science 2021 – 2025
Siddhartha Institute of Engineering and Technology, Hyderabad

Intermediate – MPC (12th Standard) 2019 – 2021
Govt Junior College, Sirpur Kaghaznagar

TECHNICAL SKILLS

- **Technical Skills:** Python, HTML, CSS, JavaScript, Bootstrap
- **Databases:** SQLite, MariaDB
- **Tools & Platforms:** VS Code, Git, GitHub, Excel and AI tools
- **Aptitude & Reasoning:** Logical reasoning, analytical thinking, and English comprehension.

ACADEMIC & PRACTICAL EXPERIENCE

AQI Forecasting via GA-based Extreme Learning Machine

- Technologies: Python, Genetic Algorithms, Extreme Learning Machine (ELM), Scikit-learn
- Developed an Air Quality Index (AQI) forecasting model utilizing Genetic Algorithms to optimize feature selection and hyperparameter tuning for an Extreme Learning Machine (ELM).
- Enhanced model accuracy and generalization capabilities over baseline conventional models by implementing advanced data preprocessing and feature engineering pipelines.

Price Negotiating Chatbot on E-commerce Website with Voice

- Technologies: Python, Flask, NLP, Speech Recognition, SVM, KNN, MariaDB
- Built an AI-powered conversational chatbot integrating Speech Recognition and Natural Language Processing (NLP) to handle real-time, voice-and-text-based price negotiations.
- Implemented machine learning classifiers (SVM, KNN) to predict optimal discount thresholds and integrated a MariaDB database to manage real-time product details, user orders, and reviews.
- Designed and deployed the application architecture to automate bargaining workflows, enhancing user engagement and simulation realism.

Image Classification System

- Technologies: Python, TensorFlow, Scikit-learn, Streamlit, Computer Vision
- Designed and engineered a robust image classification system capable of training and evaluating deep learning architectures across diverse image datasets.
- Constructed modular ML pipelines for automated data ingestion, preprocessing, model training, performance evaluation, and serialization.

CERTIFICATIONS

- Image Classification (ML) – EI Systems Pvt. Ltd.
- Web Development Internship – Bharat Intern
- Building Dashboards using PowerBI & Excel – NxtWave
- Generative AI Mega Workshop – NxtWave

CORE COMPETENCIES

- **Communication:** Collaborated with teams during project development strong Communication skills.
- **Problem-Solving:** Strong logical reasoning and algorithmic problem-solving, with a focus on efficient debugging.
- **Adaptability:** Quickly learned and applied new tools and frameworks across multiple live projects.
- **Time Management:** Strong ability to prioritize tasks, manage workload, and meet project deadlines consistently.
